BOIL WATER NOTIFICATION
RRA – ARROWHEAD LAKE LOTS WATER SYSTEM
West Side Customers Only

Due to the water pressure level dropping below the required 35 psi, the Texas Commission on Environmental Quality requires the Authority to notify all customers to boil their water prior to consumption until the pressure is restored and bacteriological samples can be collected and tested.

To ensure destruction of all harmful bacteria and other microbes, water for drinking, cooking, and ice making should be boiled and cooled prior to consumption. The water should be brought to a vigorous boil and then boiled for two minutes. In lieu of boiling, you may purchase bottled water or obtain water from some other suitable source.

Once the pressure is restored, bacteriological samples will be collected throughout the system. Upon receiving negative bacteria results on the samples collected, you will be notified that the Boiled Water Notice is cancelled.

Should you have any questions regarding this matter you may contact Mr. Jon Faris at (940) 636-8232 or myself at the number below.
